

Unleash the power of Granular Diagnostic Data

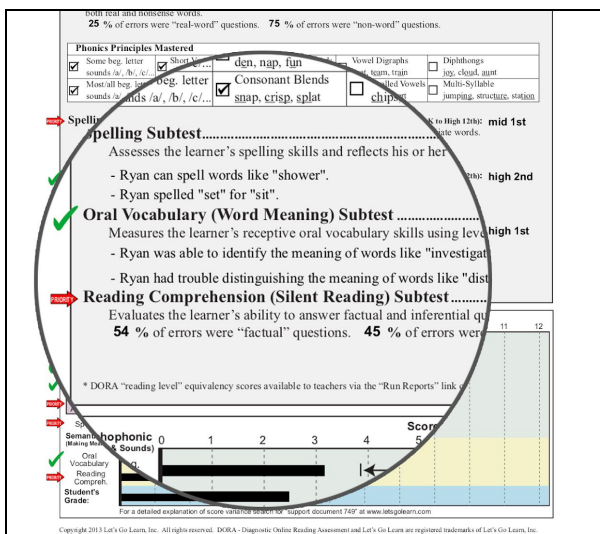

Bring Effective Diagnostic Online Reading and Math Assessments to Your Classrooms

With Let's Go Learn's diagnostic assessments, classroom teachers, administrators, and even parents can access incredibly rich and meaningful diagnostic data in just clicks. Diagnostic assessments provide granular insight across multiple sub-skill indicators, so educators no longer need to determine why a summative assessment score is low, but can pinpoint exact areas to focus, and ensure students stay on the right track to success.

Drive Learning with Actionable Data

Quickly measure what matters and identify student needs

Let's Go Learn's diagnostic assessments measure student performance, skills, and growth to help educators support the unique learning needs of every student. The platform provides role-specific reports that transform complex data into actionable insights. With a complete picture of each individual student's learning needs and progress, classroom teachers can quickly build small instruction groups for differentiated learning, share results with stakeholders, and set specific learning goals for every student.

Math Diagnostics

Powerful data across foundational math through algebra.

ADAM (Adaptive, Diagnostic Assessment of Mathematics)

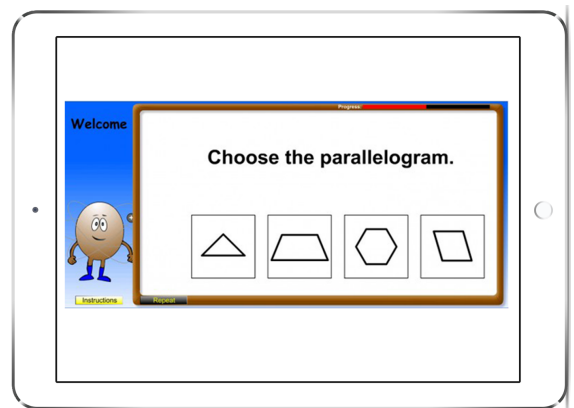

is designed specifically to be fully aligned with the Common Core Standards, ADAM assesses across 44 constructs within NCTM's five instructional strands.

DOMA Pre-Algebra intelligently assesses students in 14

Pre-Algebra constructs and follows with a detailed roadmap for remediation/instruction.

DOMA Algebra assesses students in 11 Algebra constructs and follows with a detailed roadmap for remediation/instruction.

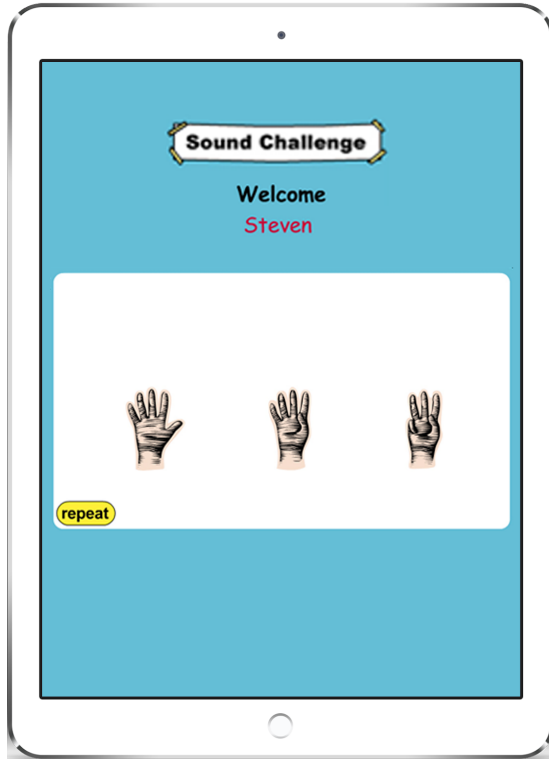

ADAM K-7 Interface

Reading Diagnostics

The best practices in reading assessment within an online platform.

DORA Phonemic Awareness Interface

DORA (Diagnostic Online Reading Assessment)

is a K-12 measure that provides objective, individualized assessment data across eight reading measures that together profile each student’s reading abilities and prescribe individual learning paths.

DORA Phonemic Awareness is ideal for non-readers or struggling readers, measures nine phonemic awareness skills using audio and picture-only items, for a thorough assessment of oral phonemic awareness skills.

DORA Spanish/EDELL is a powerful, diagnostic online assessment of student Spanish reading abilities. *DORA Spanish/EDELL* provides an effective means of comparing students’ first language Spanish abilities with their developing second language English reading skills.

Let’s Go Learn Diagnostic Assessments at a Glance:

Pinpoint critical instructional areas for each student

Monitor progress over time and ensure student growth

Leverage granular data to differentiate instruction

Quickly identify students in need of RtI Tiers 2 and 3 support

Connect assessment data to adaptive personalized learning software

Assess narrative reports to inform IEPs, instruction initiatives, and stakeholder conversations
