Note: DORA uses non-fiction passages that get longer by passage grade-level and doesn't allow look-back. Comprehension mastery is required via six multiple choice questions per passage. As a result, reading conversions and equivalencies between different types of assessment may vary significantly. Lexile scores represent the highest Lexiled level passage that a student successfully read and demonstrated mastery by answering questions correctly. DORA is not a readability assessment. It is a diagnostic.

\* The Fountas-Pinnell and DRA conversions shown in this table are straight conversions using the DORA Comprehension (CO) sub-test score by itself.
