

ADAM Pre/Post Gains Export and its Column Headings Legend

The totals in the gain columns are calculated by subtracting the scores on the students 2nd test from the scores on the 1st test.

- D. Student login (username)
- E. First Name
- F. Last Name
- G. Date of Birth
- H. Grade
- I. Date of first assessment taken within date range entered
- J. Date of last assessment taken within date range entered
- K. **GradeScore_G** (Gain – Represented by a positive or negative)
- L. **NUM_G** - Numbers and Operations Gain
- M. **ME1_G** – Measurement Gain
- N. **DAT_G** – Data Analysis Gain
- O. **GEO_G** – Geometry Gain
- P. **ALG_G** – Algebra Gain
- Q. **GradeScore_1** – Grade Score from 1st test date
- R. **NUM_1** – Numbers and Operations - 1st test score

- S. ME1_1 – Measurement – 1st test score
- T. DAT_1 – Data Analysis – 1st test score
- U. GEO_1 – Geometry – 1st test score
- V. ALG_1 – Algebra – 1st test score
- W. GradeScore_2 – Grade Score from 2nd test date
- X. NUM_2 – Number and Operations – 2nd test score
- Y. ME1_2 – Measurement – 2nd test score
- Z. DAT_2 – Data Analysis – 2nd test score
- AA. GEO_2 – Geometry – 2nd test score
- AB. ALG_2 – Algebra – 2nd test score
