

# How can I check to see if my students have completed their assessments?

To check the status of your student's assessment, go to the Test Queue page of your teacher/parent account. There are two columns that will show tests that have been queued and tests currently in progress and two columns that show the date of the most recently completed assessment.

The screenshot shows the 'Manage Queue' page in the Let's Go Learn system. The 'Test Queue' tab is selected. The table below shows student assessment data:
