

How Teachers Access the *LGL Data Portal*

Overview: The *LGL Data Portal* is a technically a data warehouse. This means it was designed to store student rosters and assessment/instruction data over time. In addition, it was designed to provide the type of reports needed by teachers and administrators for more advanced data analysis. The addition of the *LGL Data Portal* is the first step in providing more advanced features for our customers.

Step One: Once logged in as a teacher, go to the <Scores & Reports> tab and select "Data Portal"*

LGL Data Portal: The *LGL Data Portal* is a separate system that is linked to the regular Let's Go Learn Learning Management System. A new window will open and you will be logged in.

Welcome to THE LGL Data Portal!

To begin please Log In and select the report or extract that you require.

Step Two: Select "Teacher_Exports" from the <Teacher> menu for exports such as the "Raw Scores" report or the "Pre/Post Gains" report.

Note: For accounts with "Premium Teacher Access," performance band and other graphical reports will be available. You will need to talk to a Let's Go Learn staff member to find out how your accounts can gain access to these advanced reports.

* If you do not see the "Data Portal" option, you may have a family account. You will need to talk to our customer service to get your account upgraded. When communicating with our support please provide your account login so that we can more quickly identify your account for updating.
