

Powerful Dynamic Data Reporting to Guide Modern Districts

Access more granular data to inform program efficacy and student achievement

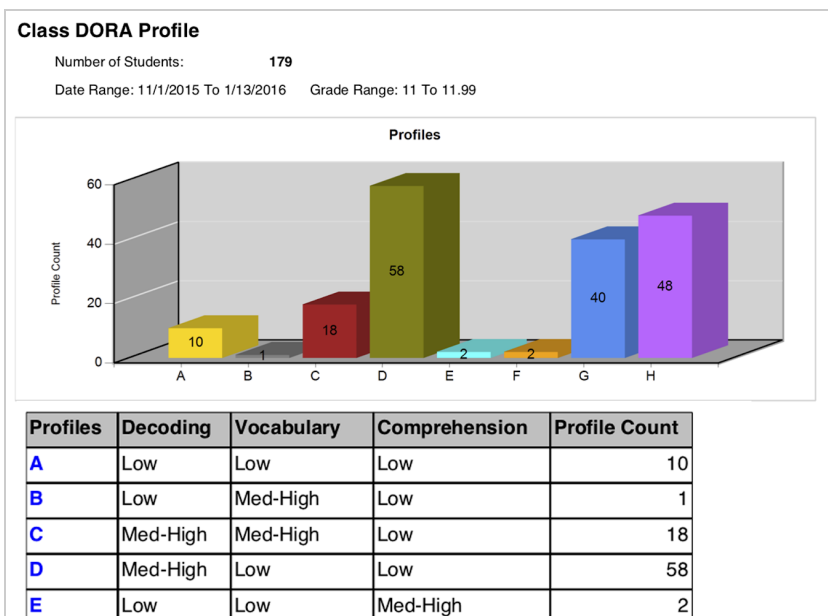

All Let's Go Learn assessment data lives within the *LGL Data Portal*, the platform's powerful data warehouse. This secure system effectively meets modern data demands for the largest districts. By storing both current and historical assessment data for several million students, educators can easily access and analyze student data reports to determine program efficacy and drive student achievement.

The **Performance Band Report** can be run across multiple sites or a single site, and can be adjusted by specific filters. This view shows six subtests of reading by three developmental groups.

Immediately Access Relevant Data by Role or Report

Measure performance trends and determine district by site, grade, or student

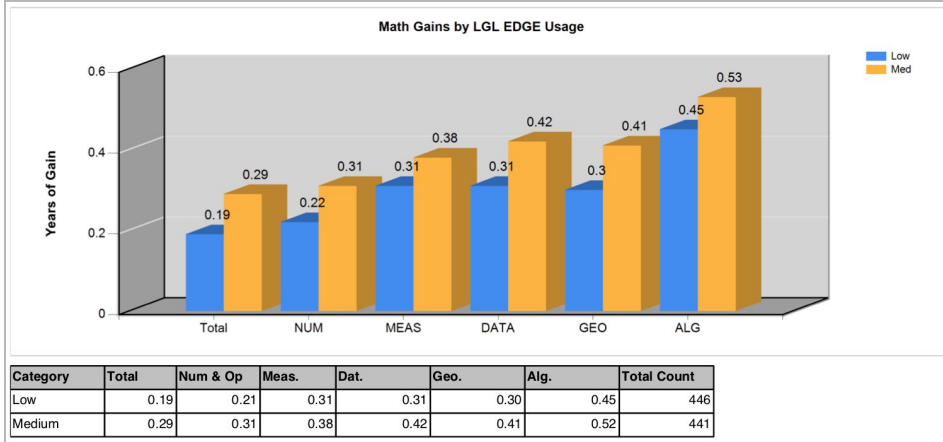

The *LGL Data Portal* provides all stakeholders with the most meaningful data reports based on each role. Site leaders and principals can access specific buildings, administrators can review entire districts, and regional administrators can cluster data reports by schools. Drill down opportunities allow users at the classroom level to explore reports based on the specific needs for classroom performance reporting.

This **Assessment Profile Report** shows students by their *DORA* reading profile and can help determine which type of interventions are needed.

Track Student Gains Over Time

Explore usage data compared over time and by predetermined specifications.

The *LGL Data Portal* allows users to examine how usage impacts student growth pre-assessment and post-assessment. The system can also take course enrollment on other interventions and provide growth measurements. Users have the ability to set thresholds and filter data for each report.

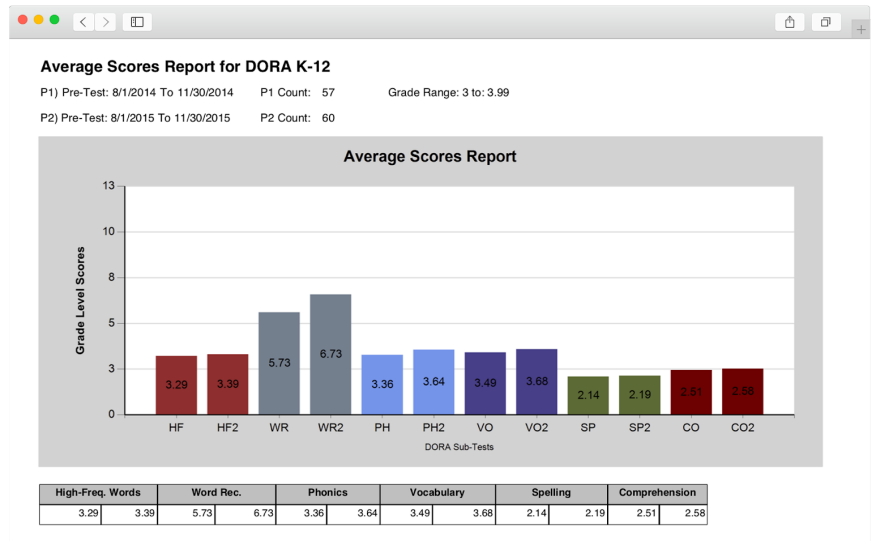

Data Portal Packages

Base Reports Package:

- Graphical Site Reports
- Data Exports

Federal Programs Reporting Package:

- Use of Student MetaData for Performance Band Reports
- Includes Required Categories:
 - FRM
 - Title I
 - EL
 - Hispanic, Race, etc.
- Teacher Access to Graphical Reports (Add-on)

The **Average Scores Report** is a powerful tool for Personal Learning Communities and principals to analyze curricular gaps and to formulate strategies to accelerate student learning one grade level at a time.
