

Overview: Let's Go Learn provides highly diagnostic assessments in reading and math that identify instructional points of students across multiple sub-tests within reading and mathematics. The data will provide teachers with guidance in how to meet the needs of individual students through personalized learning. In addition summary reports will at times be shared with parents and/or students.

Let's Go Learn is the developer of its assessments and the sole sourced distributor via its direct sales network.

Privacy and Security:

- No student data is shared with any third-party other than Let's Go Learn.
- All student data is stored on secure servers using current security protocols.
- Students will not be exposed to any advertisement while on Let's Go Learn.
- Students will not be exposed to any instant messaging or blogging while on Let's Go Learn.
- Students data is not accessible via any student logins. Student logins only allow students to perform assessments.
- Teachers and students login at www.letsgolearn.com via a secure https encrypted connection

Student Information Used by Let's Go Learn

- First and Last name of student
- Date of birth - Used to understand developmental level of student. If a student is struggling in reading sometimes age is a factor as opposed to grade level.
- Grade level of student
- Student ID - Used to identify a student within a district and prevent duplicates

Protections of Student Data:

- Teachers have access to student reports and data via their teacher account that uses a encrypted secure login process.
- Student logins cannot access any student information or data other than the student seeing their name in a welcome message upon logging in.
- As per current privacy guidelines, student personal information data will be deleted if the school, district or ecomm account chooses to discontinue the use of Let's Go Learn or a significant period of inactivity in all customer accounts.
